

Skeletal Dynamics – About Us

Long Version

Skeletal Dynamics was founded in 2007 with the goal of understanding the clinical challenges of upper extremity surgery and providing innovative, science-based solutions to solve unmet clinical needs. The upper extremity surgeon's vision, clinical perspective, and patient-needs guide all our decisions. Our mission is to become the premier upper extremity company on the planet by maintaining our focus on four key areas, our "pillars", to better understand and serve the upper extremity surgeon and patient. Exclusively Upper Extremity – Innovation Based on Science – World Class Education – Trusted Service.

Short Version

Understanding the clinical challenges of upper extremity surgery to provide innovative, science-based solutions backed by world class education and trusted service.
